PROFESSIONAL SUMMARY

Operations data analyst with **4+ years** across logistics, distribution and billing. I build tools that operations teams use every day: a **delivery traceability platform** monitoring about **2,500 delivery notes per month** and **SLA-based alerts** for pick-up orders. Hands-on with **SQL**, **Python (pandas)**, **Power BI (DAX)** and **Power Automate**, working on logistics processes in **SAP**. Open to remote data, BI or operations analyst roles.

WORK EXPERIENCE

Transportation & Logistics Analyst

Penguin Random House | Apr 2026 – Present

- Built and deployed a delivery traceability platform (Python, pandas, SQL, Power BI, Power Automate, Render) that the logistics team uses daily to monitor about 2,500 delivery notes per month.
- Replaced email-based follow-up with automated checks that did not exist before, closing information gaps between the 3PL, carriers and the company.
- Developed a Power BI pick-up orders dashboard used across the operations area, with automated email alerts for SLA-critical orders.
- Manage delivery notes, proof of delivery, pick-ups and returns in SAP; coordinate a third-party logistics provider (3PL) and regional carriers.

Owner & Operations Manager

Beverage Distribution Business | 2025 – Jan 2026

- Ran the entire operation single-handedly: about 100 local retail customers and 200 orders per week.
- Managed order intake, inventory, suppliers and electronic invoicing.
- Planned daily delivery routes and tracked deliveries and their documentation.

Operations & Documentation Administrator

Autobuses S.A. | 2023 – Feb 2025

- Managed technical and administrative documentation for a fleet of 120+ buses.
- Assigned maintenance tasks to the mechanics team and reported fleet status to management and HR.

Billing Administrator (part-time)

Consultorio de Salud Ayres (medical practice) | 2022 – Present

- Bill about 200 patients per month to roughly 35 health insurers through ARCA (Argentina's tax agency) and insurer portals, including supporting documentation.
- Building a personal Python/FastAPI tool to automate ARCA electronic invoicing.

TECHNICAL SKILLS

- SQL (PostgreSQL, MySQL)
- Python (pandas, NumPy)
- Power BI (DAX, Power Query)
- Power Automate
- Advanced Excel
- SAP (logistics documents)
- FastAPI & REST APIs
- Git
- Render

EDUCATION

Computer Systems Engineering

Universidad Abierta Interamericana | 3 years completed

- **SQL & Power BI for Data Analysis** – Platzi
- **Python & pandas for Data Analysis** – Coderhouse
